

Depth of Expertise, Value of Quality and Efficiency

A specialist supply and ship-repair partner built on 20+ years of combined OEM and original-equipment experience.

Our Capabilities

WHAT WE OFFER

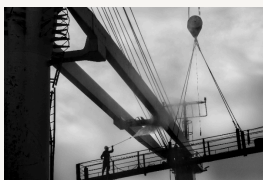

01 Equipment & Spare Parts Supply

Genuine and quality-assured parts and equipment sourcing through direct OEM and original-builders based on relationships. Fast, traceable and reliable.

02 Technical Services & Afloat Repairs

On-site and afloat repair capability delivered by engineers with hands-on backgrounds at OEM manufacturers and equipment builders.

03 Ship-Repair Project Management

End-to-end management of the ship-repair process coordination, scheduling and quality oversight that keeps vessels on time and on budget.

WHO WE ARE

Born inside Iron Group. Trained inside the OEMs.

Iron Trade House was founded in Istanbul as part of **Iron Group**, whose companies span commodity trading, fleet management, oil & petroleum and maritime consultancy. Our team brings 20+ years of combined experience in marine and power generation, including professionals who come directly from OEM manufacturers.

This foundation provides a depth of technical knowledge and supplier relationships that few trading houses can match.

01 Equipment & Spare Parts Supply

The right part, from the right source, at the right time.

Through direct relationships with OEM manufacturers and original equipment builders, we supply genuine and quality-assured parts for main engines, auxiliary engines, generators, turbochargers, pumps, compressors and associated systems — with full traceability on every delivery.

Genuine & OEM-Quality Parts

Sourced directly from manufacturers and approved makers. "Never grey-market."

Door-to-Deck. Worldwide.

Delivery to vessels, agents and sites anywhere on the globe, including urgent and fast AOG-style dispatch. Online order tracking for clients through CRM system.

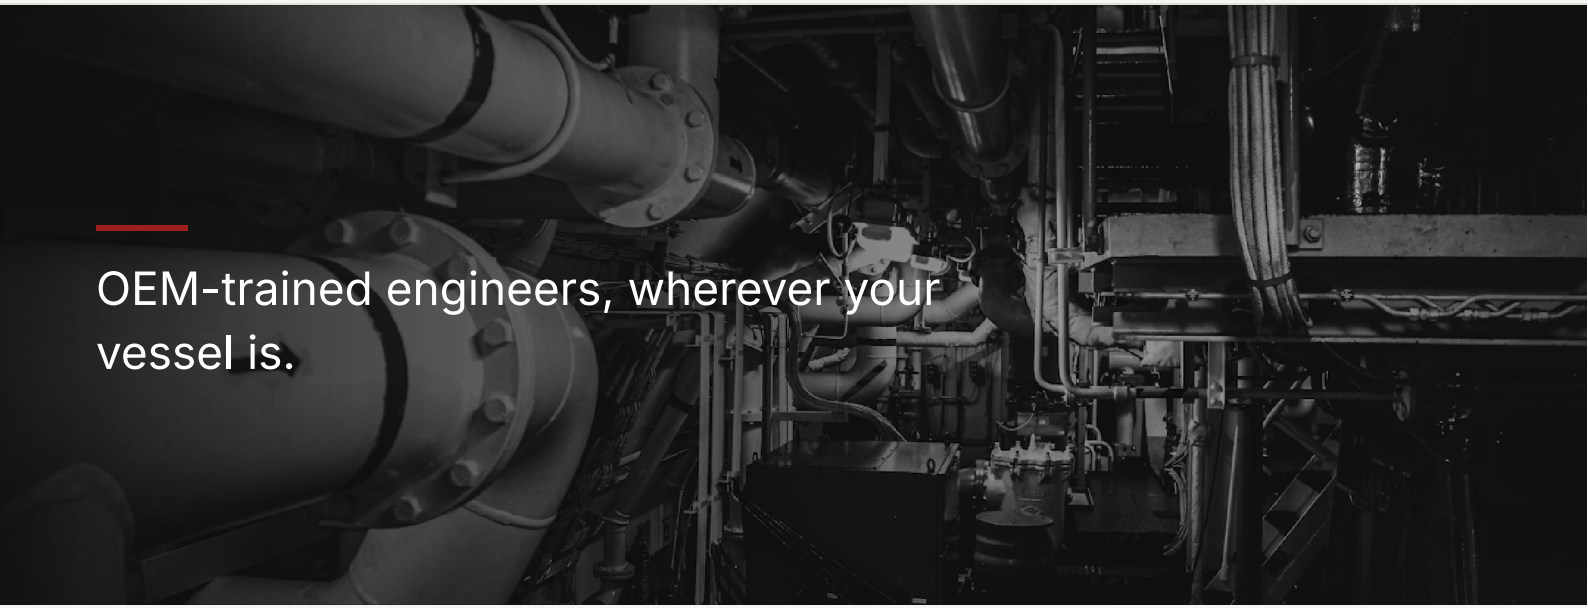

Full Traceability

Certificates, test reports and documentation supplied with every order.

Obsolete & Hard-to-Find Items

Supplier network and technical know-how built over 20+ years provides even tailor made manufacturing.

02 Technical Services & Afloat Repairs

A black and white photograph of a ship's engine room, showing various pipes, valves, and mechanical components.

OEM-trained engineers, wherever your vessel is.

Our service engineers come from OEM manufacturer and original-builder trainings. We attend vessels in port, at anchorage and during voyage, resolving mechanical, electrical and automation issues without taking the ship out of service.

Afloat & Voyage Repairs

In-port, anchorage and riding-squad attendance. No dry-dock required.

Troubleshooting & Diagnostics

Performance analysis, vibration measurement and root-cause investigation.

Class-Approved Welders — Voyage Repairs

Certified welding teams for steel renewals, crack and pipe repairs carried out at sea or in port, meeting classification-society standards.

Engine & Generator Overhauls

Main and auxiliary engine overhauls, turbocharger and governor service.

Commissioning Support

Installation, alignment and start-up support for new and refit equipment.

UTM — Ultrasonic Thickness Measurement

Hull and structural thickness gauging with class-compliant reporting, supporting surveys and condition assessment.

03 Ship-Repair Project Management

One accountable partner from specification to redelivery.

We manage the complete ship-repair process on the owner's behalf, from repair specification and yard selection through daily supervision to final acceptance. Protecting budget, schedule and quality at every stage.

Specification & Tendering

Preparing repair specs, processing yard tendering and commercial negotiation on your behalf.

On-Site Supervision

Daily progress, quality and HSE oversight throughout the yard period.

Budget & Schedule Control

Cost tracking, variation management and transparent owner reporting.

Class & Redelivery

Class survey coordination, sea trials and documented final acceptance.
